# Intent of this Guide

This BrandGuide is a reference for our internal design team, and others who are authorized to work with the Shaheqa brand.

The standards, guidelines, and references within the document are grounded in the years of research, experimentation, and brand executions that have preceded our new brand look and feel.

Our intent with this guide is not to restrict creativity and innovation far from it, we believe in the creative spirit, and innovation is one of our core values.

What we strive for is coordinated, consistent, and effective brand presence in everything we create if we make something, we want to make sure that people know where it came from.

While some of our brand execution and graphic have standardized like business cards and letterhead and envelopes these are not intended as the focus of this guide.

Instead the focus of this guide is to empower you, the creative with the elements you need to create by utilizing these tools, resources and adhering to the guidelines within, you'll do things that will look like the Shaheqa brand every time.

Please refer back to this guide often we believe that our Brand Manual is a living document it should evolve over time just as our brand inevitably will.

If you have any questions concerning the content of this guide, please don't hesitate to reach out to our Brand Manger at.

### Typography | Type in Use | طريقة الاستخدام

When constructing layouts, these tips will help you build dynamic, interesting, and on brand compositions with typography. While these rules are proven and sound sometimes breaking them is the right call.

#### Stay Left or Right-Aligned

Legibility and clarity are vitally important to great typographical layouts, since people reading from left to right or right to left, we should align our type accordingly.

#### Define Hierarchy With Size & Weight

Contrast is the name of the game when it comes to great Design, play with font size to make emphasis to important text element. When in doubt, use higher weight between two text elements.

#### Watch The Rag

When setting paragraphs, keep an eye on the right (ragged) edge. If the rag unintentionally creates a shape, consider tweaking the language or resizing the container, also, try to prevent single word lines (orphans).

#### Align X-Heights or Baselines

Whenever you place text next to each other, either align the baselines (the line that the bottom of lowercase x sits on) or align the x-heights (the top of a lowercase x). This helps align each line visually.

#### Give things Space, if Needed

Negative space, or the space around elements is vitally important. That being said, if informational elements belong together, move them closer together. Use grouping wisely, just try not to cram too many things in one space.

#### Keep Line Length Reasonable

It is for the user to get lost in long lines of text and short ones are easily ignored. It is best to keep lines between 45 and 70 characters long, depending on the size of the font. This will ensure legibility.

## Visual Toolkit

### Typography | Master Style List | قائمة الأنماط الرئيسية

When constructing layouts, these tips will help you build dynamic, interesting, and on brand compositions with typography. While these rules are proven and sound sometimes breaking them is the right call.

## HEADLINES

- Headlines should be short, clear, and "hook" the user into reading More
- Use & instead of and
- Use Title Case, not sentences case

## PUNCTUATION

- Use consistent Punctuation.
- Don't use space around the em-dash
- Do not end bulleted or numbered list in periods, unless the list contains multiple sentences.
- Do not hyphenate paragraph
- Don't put space after "٩" in arabic

## CONTACT INFORMATION

- Phone number should always use space in 3-3-4 or 2-3-4 format ,do not use periods for example:  
050 123 1234 or 50 123 1234
- Don't use 1:30PM or 1:30
- Use full name for days for example  
Sunday-Saturday
- Use 24 hours formatting
- dont use AM-PM

## FORMATTING

- Cap the first words in a sentence
